

MOBILE EMERGENCY NOTIFICATION & INCIDENT MANAGEMENT

Critical and disruptive incidents can occur anytime. Today, organizations must embrace a mobile-first strategy for emergency notification and incident management, so they can quickly respond to critical incidents, safeguarding their workforce.

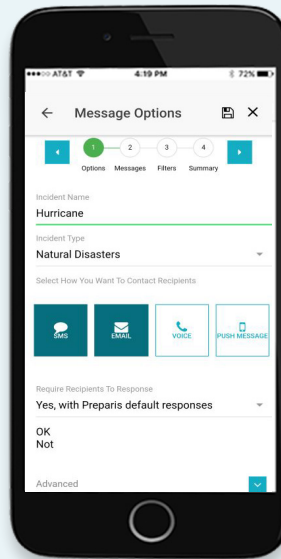

Available for iOS and Android, the Preparis Mobile App is a full-featured mobile solution that includes:

BI-DIRECTIONAL MASS EMERGENCY MESSAGING

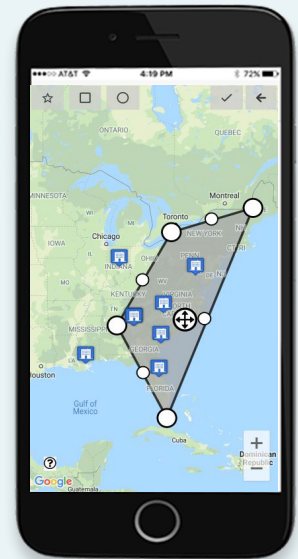

Full-featured native app for mass notification and incident management

Quickly send notifications by locations, departments, or custom groups. Create new messages or use saved message templates pinned to your dashboard

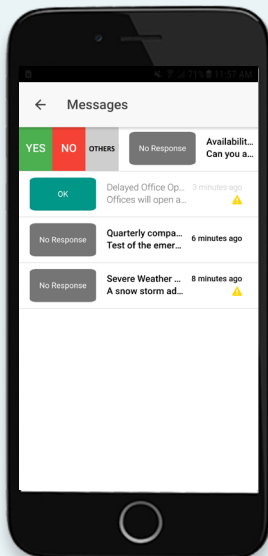

Draw multiple geofences for broad location-based notifications to inform an on-the-go workforce

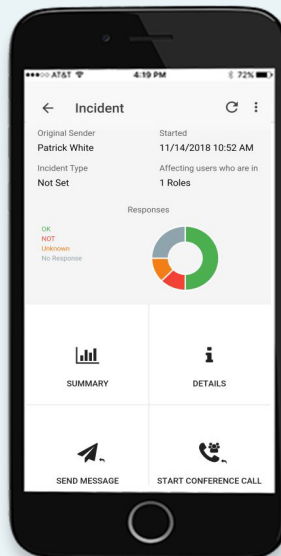

INCIDENT MANAGEMENT

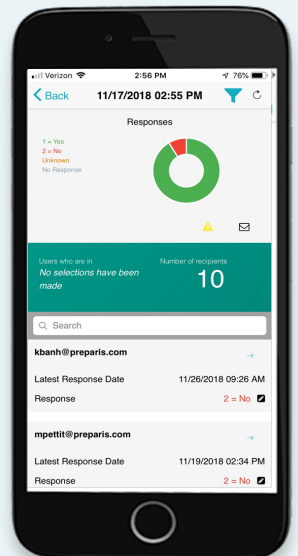

Easily reply to notifications with one-click to precisely communicate status during emergencies

Track workforce response to notifications on a dashboard summarized by users, locations, or groups

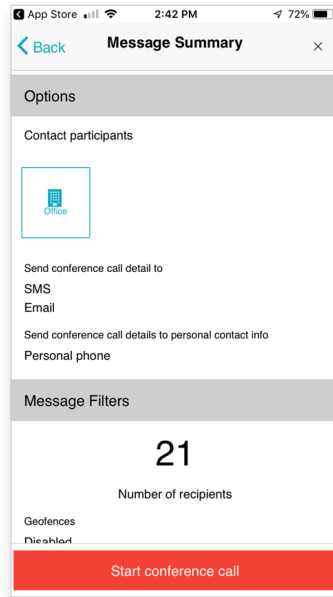

Quickly send follow-up messages to employees with specific response types - Like 'No Response' or 'Not Safe'

Full-Featured Native Mobile Application

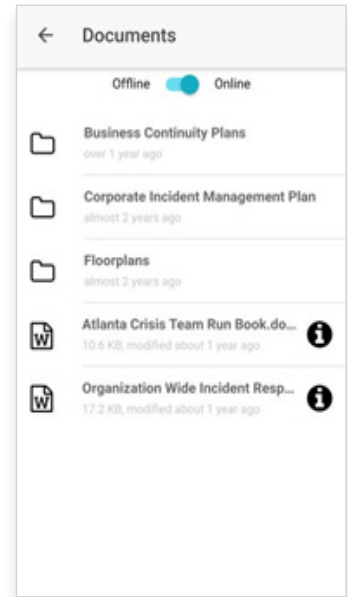

PROACTIVE CONFERENCE CALLS

- Crisis teams can initiate instant emergency conference calls
- No dial-in numbers required
- No PINs, or passwords needed

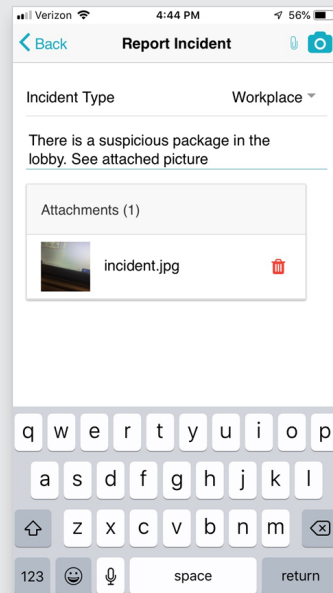

ACCESS TO CRITICAL DOCUMENTS

- Access business continuity and emergency action plans
- Store PDF, Excel, Word, and other document formats
- View documents online (cloud) or offline (local mobile device)

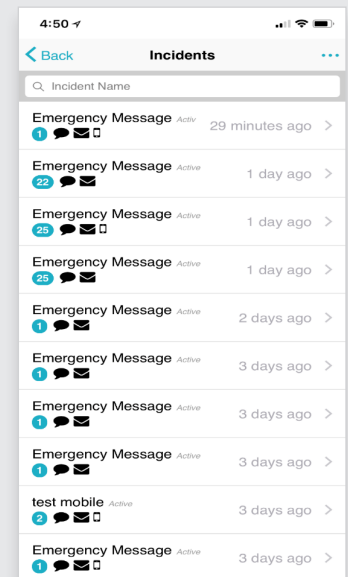

INCIDENT REPORTING

- Quickly report incidents
- Include detailed notes and pictures

INCIDENT HISTORY

- View past incidents and associated incident metrics
- Metrics include: incident details, notes, attachments, summary of responses, and individual response selections
