

# Answer the video intercom from your smartphone and communicate with your visitors!

IpDoor is a video intercom with display that ensures you are always there when people call! Thanks to the App on your smartphone, you can answer whenever someone rings, speak to your visitor, also on video, send voice mail and open the door, using Bluetooth and NFC technologies. You can also watch the videos later of those who called you. You don't need anything other than Wi Fi and an electrical connection, but you may also choose a wired connection. What if internet isn't working? No problem, IpDoor is designed to operate at all times!
